Bionnovation Biomedical is a **Brazilian** company that offers comprehensive solutions for all phases of implant therapy and bone reconstruction.

Currently, the product line consists of biomaterials capable of providing highly satisfactory clinical and aesthetic results.

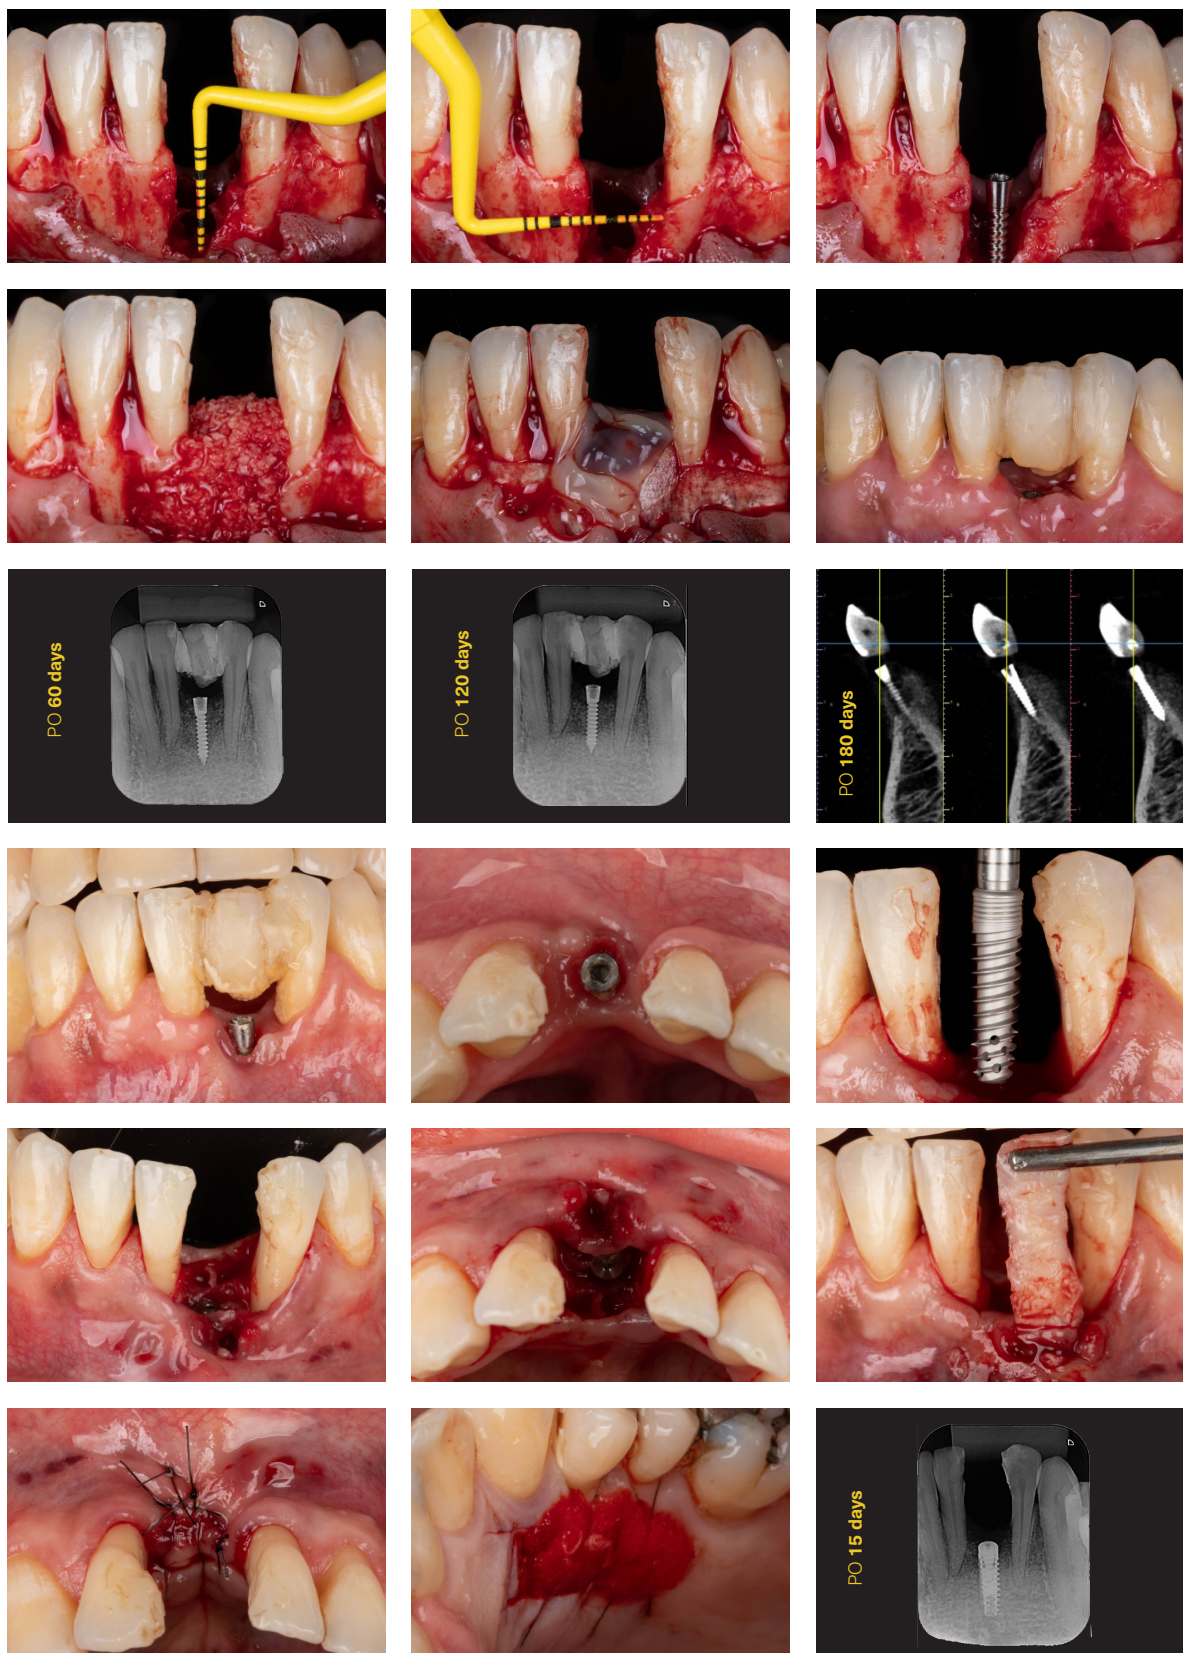

Biomaterials are ancillary products in bone regeneration processes that provide excellent clinical solutions with high success rates and minimal patient discomfort.

Our regenerative line is made up of alternative filler materials for bone grafting procedures, absorbable membranes, non-absorbable barriers, bone screws, titanium meshes and tent screws.
